

# ABSTRACT OF THE ACADEMIC DISCIPLINE

## "MEDICAL SUBCULTURE"

### DESCRIPTION OF THE DISCIPLINE

The subject "Medical Subculture" is taught for specialists of the second (master) level, the field of knowledge 22 "Health Care", specialty - 222 "Medicine", who are studying at the 4th year.

The subject is taught in the autumn semester of the 2020/2021 academic year.

### GENERAL CHARACTERISTICS OF THE DISCIPLINE

An important condition for the development of modern Ukrainian society is the formation of a powerful educational potential of the nation, achieving the highest quality of student training. Successful development of their profession by future doctors requires in-depth knowledge of the features of professional and corporate ethics, norms of behavior and morality, worldviews and value orientations that exist in the modern medical space. Studying this discipline requires students to take a creative approach to solving educational problems and the ability to determine their own trajectory of the educational process, which will allow them to make the most effective use of academic hours.

### THE ROLE AND PLACE OF DISCIPLINES AND IN THE SYSTEM OF TRAINING SPECIALISTS

"Medical subculture" is an educational discipline that studies the specifics of medical activity and features of medical cognition, the thinking style of a doctor, his personal culture, attributes, Customs and traditions. The very concept of "Health" today is perceived as a concept not only biomedical, but also socio-cultural. Value orientations play an increasingly important role in the medical research of a scientist and the activities of a practitioner. The professional group of medical workers is a significant original community, relatively closed, differs from other professional groups in a number of features, has its own ethics, norms of behavior and morals, ideas about the professionalism and personality of a professional, worldview ideas that are reflected in certain rituals, folklore, etc. the course is focused on helping students to facilitate the process of socialization in the modern professional medical environment of Ukraine and the world.

### THE PURPOSE AND OBJECTIVES OF THE DISCIPLINE

**Goal:** To form in senior students the knowledge necessary for successful socialization in the community of professional doctors.

**Objective:** In accordance with the requirements of the standard, discipline should ensure that students acquire the following competencies:
